PROFILE

IT engineer with **9+ years of software development** and **4 years working hands-on with IT infrastructure**, now focused on **system infrastructure, networking and technical support**. I understand computer components and can build a PC from parts; install and configure multiple operating systems (Windows Server, Ubuntu/CentOS, Proxmox VE); and troubleshoot network issues across **DNS, TCP/IP, firewalls, NAT port forwarding, PPPoE, Mikrotik and VLAN**. I operate **DELL R730XD and R640** servers running Windows Server and Proxmox. My software background lets me automate repetitive work and read system logs quickly.

CORE SKILLS

Hardware — Component-level knowledge and PC building; fault diagnosis and part replacement; DELL R730XD and R640 servers; RAID, iDRAC, RAM/CPU/SSD upgrades.

Operating Systems — Windows Server, Windows 10/11, Ubuntu, CentOS; installation, configuration, patching and troubleshooting.

Virtualisation & Servers — Proxmox VE (VM creation, snapshots, backups), Docker & Docker Compose, Linux server administration, backup and restore.

Networking — TCP/IP, DNS, firewalls, NAT and port forwarding, PPPoE, Mikrotik (routing, firewall, VLAN, multi-WAN), VLAN segmentation, NGINX/Traefik reverse proxy, SSL.

Technical Support — Workstation and software installation and configuration; hardware/software troubleshooting; user guidance; device monitoring and maintenance.

Programming & Automation — Python, PHP, Node.js, Bash; n8n; CI/CD with GitHub Actions and GitLab CI; log analysis, health-check scripting and monitoring.

EXPERIENCE

FGC Techlution — Full Stack Developer + AI Agent

02/2021 – Present

- Run on-premise infrastructure: **DELL R730XD and R640** servers, Proxmox VE, RAID, 10Gb networking — VM provisioning, snapshots, backups and resource monitoring.
- Administer the internal network: **Mikrotik** (routing, firewall, NAT, multi-WAN), **VLAN** segmentation, NGINX/Traefik reverse proxy and SSL automation.
- Maintain the **Docker** environment and CI/CD pipelines (GitHub Actions, GitLab CI) for all services.
- Develop internal software (Odoo, ClickUp integration) and AI solutions (chatbot, RAG, AI agents).

NTQ Solution — Backend Developer

09/2020 – 02/2021 · Ha Noi, Vietnam

- Maintained a Rocket.Chat-based communication platform, including backend features and cross-platform builds.
- Handled production incidents and coached junior developers.

FGC Techlution — Web Developer

05/2017 – 07/2020

- Provisioned and ran CentOS/Ubuntu VPS: NGINX/Traefik, SSL, load balancing and resource monitoring.
- Built payment and shipping plugins for e-commerce sites (WordPress, Magento, Shopify) of Australian clients.
- Set up the team’s code review process and coding conventions.

INFRASTRUCTURE & SELECTED PROJECTS

On-premise infrastructure and virtualisation — *DELL, Proxmox VE, Mikrotik*

Built and operate a physical server cluster on DELL R730XD/R640: RAID configuration, Proxmox VE installation, one VM per service, scheduled backups and resource monitoring. All traffic passes through Mikrotik with NAT, firewall, VLAN segmentation and multi-WAN, keeping management traffic separate from service traffic.

Homelab and automation — *Synology NAS, Home Assistant, n8n*

A self-hosted lab for learning and testing: Synology NAS, Home Assistant with Zigbee, and self-hosted n8n workflows — where I try out network configuration, backups and services before applying them to production.

EDUCATION

FPT Polytechnic College of Ha Noi

2013 – 2016 · Software Applications · **Very Good**

Coursework included C#/.NET, object-oriented programming, databases and web development.

LANGUAGES

Vietnamese — native · **English** — reads technical documentation confidently, good at written communication (chat/email)
