PROFILE

Software engineer with 9+ years in software development, including **4+ years of Node.js/TypeScript**, primarily with **NestJS** and **Express**. I design and build **REST/GraphQL APIs**, **WebSocket** real-time systems and backend services for e-commerce, ERP and process automation. I publish **npm packages**, have a **merged PR in the n8n core** (TypeScript), and led a 4-person team building an internal system on NestJS.

CORE SKILLS

Node.js & TypeScript — 4 years: NestJS, Express, Strapi, Koa; TypeScript, async patterns, module and package design.

APIs & Real-time — REST, GraphQL, WebSocket; API design, JWT authentication, rate limiting, OWASP security practices.

Data — PostgreSQL, MongoDB, MySQL, Redis; schema design, indexing, query optimisation and caching.

DevOps — Docker & Docker Compose, GitHub Actions, GitLab CI, Linux (Ubuntu/CentOS), NGINX, Traefik, Proxmox VE.

Frontend — React, Next/Nuxt, React Native; API integration, state management, SSR.

Automation & Integration — n8n (self-hosted, custom nodes), Dify; third-party integrations over REST and webhooks.

Also — Python (Odoo, data processing), PHP (Laravel), MongoDB aggregation.

EXPERIENCE

FGC Techlution — Full Stack Developer + AI Agent

02/2021 – Present

- Built **Node.js/NestJS backend APIs** connecting storefronts with ERP and internal systems.
- Developed and maintained sites using **Strapi (Node.js)** as the backend and Nuxt on the frontend, with a document-processing microservice.
- Built **self-hosted n8n automation workflows** and custom nodes in Node.js/TypeScript.
- Deployed services with **Docker** and CI/CD pipelines (GitHub Actions, GitLab CI); administered Linux/Proxmox servers.
- Trained and mentored interns and junior trainees.

NTQ Solution — Backend Developer

09/2020 – 02/2021 · Ha Noi, Vietnam

- Maintained and extended the **Rocket.Chat** platform (Node.js): custom backend features, new modules and cross-platform builds.
- Handled production incidents and coached junior developers.

FGC Techlution — Web Developer

05/2017 – 07/2020

- Built **Node.js** and PHP (Laravel) backends for an Australian B2B e-commerce platform.
- Developed 10+ WordPress/Magento/Shopify extensions for payments and shipping.
- Provisioned and ran CentOS/Ubuntu VPS: NGINX/Traefik, SSL, load balancing.

SELECTED PROJECTS

Fuel import/export management system — *NestJS, React, GraphQL, Redis, MongoDB*

Team lead of 4 (1 backend, 2 frontend, 1 tester). Daily fuel import/export logging, stock aggregation and statistical reports, role-based permissions and employee timekeeping. API built with **NestJS + GraphQL**, caching with **Redis**, data in **MongoDB**; React + Ant Design UI.

giaoanxanh.com — *Strapi (Node.js), Nuxt.js, Docker*

Document-sharing platform for teachers and students. Content managed in **Strapi** (Node.js) over REST, served by **Nuxt.js**, with a **microservice that converts DOCX to PDF** for in-browser viewing. Everything runs in Docker on self-managed servers.

Custom n8n nodes and npm ecosystem — *Node.js, TypeScript*

Community nodes for n8n (Synology NAS, Synology Drive), a Node-RED node for the Blynk IoT platform, a Google Drive upload CLI and a Strapi plugin — all published on npm and reused across projects.

OPEN SOURCE

- **n8n** — #15437: added the missing filters (name, projectId, pinned data, limit, cursor) to the node's `Get Many` operation (merged).
- **npm packages** — n8n-nodes-synology, n8n-nodes-synology-drive, node-red-contrib-blynk-api, node-gdrive, strapi-plugin-google-drive.

EDUCATION

FPT Polytechnic College of Ha Noi

2013 – 2016 · Software Applications · **Very Good**

Coursework included C#/.NET, object-oriented programming, databases and web development.

LANGUAGES

Vietnamese — native · **English** — reads technical documentation confidently, good at written communication (chat/email)
