PROFILE

Software engineer with 9+ years in software development, including **5 years of Python** on Odoo and AI systems. I build **chatbots, AI agents and RAG pipelines** end to end: document crawling, OCR for scanned files, chunking, embedding into **vector databases (PGvector, Qdrant)**, and question classification that routes each query to the right agent. I build workflows in **n8n** and **Dify**, ship everything with **Docker + CI/CD**, and have **merged PRs into the n8n and Dify cores**.

CORE SKILLS

Python — Odoo 16/17/18 (ORM, QWeb views, cron, custom modules), automation scripting, data processing; PostgreSQL.

AI & LLM — LLM API integration, AI agents, RAG (crawling, OCR, chunking, embeddings, vector retrieval), question classification and agent routing, prompt engineering; n8n (self-hosted, custom nodes), Dify.

Vector & data — PGvector, Qdrant; PostgreSQL, MongoDB, Redis, MySQL.

Backend & APIs — REST, GraphQL, WebSocket; Node.js (NestJS, Express), PHP (Laravel).

DevOps — Docker & Docker Compose, GitHub Actions, GitLab CI, Linux (Ubuntu/CentOS), NGINX, Traefik, Proxmox VE.

Also — JavaScript/TypeScript, React/Nuxt; PDF processing and OCR; log analysis and system monitoring.

EXPERIENCE

FGC Techlution — Full Stack Developer + AI Agent

02/2021 – Present

- Built a **RAG chatbot for import–export work**: crawls legal documents, OCRs scanned PDFs, chunks and embeds them into a vector database, and answers with source citations; a classification step routes each question to the appropriate AI agent.
- Delivered **AI agents and chatbots** for internal and customer use; built **self-hosted n8n** workflows and **Dify** applications integrated with LLM APIs.
- Developed **Odoo 16/17/18 addons in Python** for company staff: custom models, QWeb views, access rights, reporting, plus an Odoo ↔ ClickUp integration.
- Maintained the **Docker** environment and CI/CD pipelines for all services; administered Linux/Proxmox servers.
- Trained and mentored interns and junior trainees.

NTQ Solution — Backend Developer

09/2020 – 02/2021 · Ha Noi, Vietnam

- Maintained a Rocket.Chat-based platform: custom backend features and cross-platform builds.
- Handled production incidents and coached junior developers.

FGC Techlution — Web Developer

05/2017 – 07/2020

- Built backend services in PHP (Laravel) and Node.js for an Australian B2B e-commerce platform.
- Developed 10+ WordPress/Magento/Shopify extensions for payments and shipping.
- Provisioned and ran CentOS/Ubuntu VPS: NGINX/Traefik, SSL, backups.

SELECTED AI PROJECTS

AI Chatbot (RAG): HS-code and legal-document lookup — *Python, n8n, PGvector/Qdrant, OCR*

Assistant for import–export work answering two kinds of questions: which **HS code** applies to a product, and what the **legal documents** say. The system crawls state-issued regulations, **OCRs** scanned PDFs, chunks and **embeds** the text into a vector database, then retrieves by semantic similarity. The chatbot runs on **n8n** with a **question-classification step that routes each query to the right AI agent** instead of one generic prompt; every answer carries the source passage for verification.

Business AI agents and chatbots — *n8n, Dify, LLM APIs*

Tool-calling automation flows: lead capture, internal Q&A, notification routing. Self-hosted n8n with custom nodes, Dify for prompt and app management, all running in Docker behind a reverse proxy.

Internal Odoo addons — *Python, PostgreSQL*

Built Odoo 16/17/18 addons: custom models, QWeb views, access rights, scheduled actions and reporting, plus an Odoo ↔ ClickUp addon that lets employees report time inside Odoo and syncs it to ClickUp tasks automatically.

OPEN SOURCE

- **n8n** — #15437: added the missing filters (name, projectId, pinned data, limit, cursor) to the `Get Many` operation (merged).
- **Dify** — #21582: model-provider validation API in core (merged).
- **Dify official plugins** — #1186: implemented the **Gemini text embeddings** plugin (merged).

EDUCATION

FPT Polytechnic College of Ha Noi

2013 – 2016 · Software Applications · **Very Good**

Coursework included C#/.NET, object-oriented programming, databases and web development.

LANGUAGES

Vietnamese — native · **English** — reads technical documentation confidently, good at written communication (chat/email)
